Utility of circulating calprotectin – today and beyond

Marvin J. Fritzler, Ph.D., M.D.,
Professor of Medicine
Cumming School of Medicine,
University of Calgary

The presentation will focus on the emerging importance and utility of circulating calprotectin as a biomarker for COVID-19 disease. Background on SARS-CoV-2 and COVID-19 will include evidence for a variety of biomarkers that are currently considered indicators of disease progression, as well as COVID-19 outcomes and morbidity. Rationale for considering circulating calprotectin as a biomarker will include background on the physiological role of calprotectin followed by current evidence showing the advantages of calprotectin over other proteomic biomarkers. The conclusion will include challenges in calprotectin detection along with potential applications in other autoinflammatory disease states.
