

Optimizing Patient Flow and Enhancing Metrics in the Emergency Department with Point-of-Care Basic Metabolic Panel Testing

Emergency Department (ED) crowding leads to treatment delays, extended lengths of stay, staff frustration and turnover. The implementation of point-of-care Basic Metabolic Panel (BMP) testing can significantly help improve key metrics in the ED. Our speakers will discuss the clinical significance of BMP testing, and its positive impact on cost, time, and patient care in the ED.

Speakers

Christian Neff, M.D.

Attending Physician, Intermountain Medical Center, Intermountain Healthcare System, and Adjunct Assistant Professor, Dept of Emergency Medicine, University of Utah, Salt Lake, UT, US

Antonio Leon-Justel, PhD

Head of Clinical Service Analysis, and Chief of Laboratory Medicine, Virgen Macarena University Hospital Seville, Andalucía, Spain

Session Overview

- What is BMP?
- Value of BMP at the POC, and in the ED, specifically
- Hospital case study
- Q&A

Objectives

- Define BMP and understand the value on BMP testing in the ED
- Identify patient conditions where BMP has a positive impact
- Discuss a case study comparing POC vs. laboratory testing in the ED

Date

June 22, 2023

Time*

17:00 – 18:00 CEST
(11:00 AM–12:00 PM ET)
