

ENVIRONMENTAL POLICY OF INSTRUMENTATION LABORATORY SPA

The environmental management system implemented by Instrumentation Laboratory, a Werfen company, at the distribution center located in Italy – Roncello, via Leonardo da Vinci 36 - is focused on the following scope:

Integrated logistic services for in vitro diagnostics and medical devices.

Handling, controlled and refrigerated temperature storage, packing and transport packaging.

The environmental management system establishes an environmental policy based on the following principles:

1. Implement and effectively maintain an environmental management system that meets the ISO 14001 requirements, so as to ensure the continuous improvement of environmental management within the organization;
2. Meet the requirements of the applicable environmental legislation (European, national, regional and local) and the requirements identified by the organization, including the requirements of the customers, the social community and the stakeholders affected by the environmental management system;
3. Analyze the context in which the organization operates from the services and products life cycle perspective, establish and periodically monitor the environmental objectives, perform the corresponding actions to preserve the environment, by preventing contamination and reducing the significant environmental impacts associated with environmental aspects, such as consumption of resources and production of waste or other kind of contamination, deriving from the activities, products or services provided by the organization, with the main purpose of environmental protection;
4. Inform and make aware the personnel, in accordance with the responsibilities and activities of the environmental management system, facilitating their knowledge so that they can operate in the respect of the surrounding environment;
5. Require suppliers to perform their activities related to the product supplied or the service provided, in accordance with the principles of this policy and in accordance with the guidelines of the environmental management system of Instrumentation Laboratory;
6. Make available the environmental policy to personnel, customers and the community in general;
7. Ensure the effectiveness of the principles listed above, by carrying out periodically audits on the environmental management system, so as to ensure that it is properly documented, implemented and maintained.
