

ENVIRONMENTAL POLICY

BIOKIT SA, which since its inception in 1973 designs, develops, manufactures, and distributes kits and reagents for *In Vitro* diagnosis, establishes its Environmental Policy based on the following principles by:

1. Implementing, maintaining, and continuously improving the Environmental Management System according to the requirements of the UNE-EN-ISO 14001:2015 standard for the improvement of environmental performance.
2. Fulfilling the requirements of legislation and regulations and further requirements that the company assumes together with implied environmental parties.
3. Establishing periodical environmental objectives and goals and monitoring them.
4. Being committed to protect the environment, prevent pollution, and reduce significant environmental impacts associated with aspects such as resource consumption, waste generation and others derived from its activities, products, and services.
5. Informing, training, and communicating the policy to employees, and make it available to relevant company stakeholders.
